About This Game

I think you should play Photographs.

I tried to make it a little bit different from most games. It sort of mixes puzzle and narrative in a (hopefully) interesting

5 mins and it is already heartwarming and nice. The whole idea of combining narrative and puzzle is great, good job pals. But I have something that bothers me a lot, when you fail puzzle, there are no options to restart it except of save->quit->play. And this consequence of actions really breaks immersion, would be great if you would fix that UPDATE: Have found the way to restart puzzle: in Alchemist and Preventer story you should drag yellow dots on top of the screen, in Newspaper story, you should drag dates. Also, as I expected - amazing game with solid narrative part, totally will recommend it.. Entertaining puzzle game with nice gameplay ideas and a short but emotional story (or better stories) . It's a great experience that you can play through in one setting. The difficulties of the puzzles are balanced, but overall it could have been a bit more challenging. Focus is on the story that is beautifully written and supported by an atmospheric soundtrack. I would play more of the same if there were more content. However you can't complain for the price. If you haven't played any of the developers previous works check them out, too.. This game will stick with you for a good while if you're into strong narratives and metaphors (and also great pixel art, smooth music and creative game mechanics). You'll also hate it a little because it'll break your heart approximately six times. Do take your time to fully suck in the stories presented to you. The puzzles may seem too easy at some times and too hold-uppity at other times, but if you fully see them as what they are - a representation of the hardships the protagonist is currently going through - it's actually veryvery clever.. Entertaining puzzle game with nice gameplay ideas and a short but emotional story (or better stories) . It's a great experience that you can play through in one setting. The difficulties of the puzzles are balanced, but overall it could have been a bit more challenging. Focus is on the story that is beautifully written and supported by an atmospheric soundtrack. I would play more of the same if there were more content. However you can't complain for the price. If you haven't played any of the developers previous works check them out, too.. Quite different from the other EightyEight Games. Simple starting puzzles with a heavy narrative drive. Did not feel well after the first one. New mechanics introduced for each vignette.. This game took me about 3-4 hours to beat on the first go around. While short, Luca does an amazing job of telling 5 different stories that all showcase the power of choice. This is a very heartfelt game and worth every dollar.. The heart of this "game" is the stories. Most of the five tales are beautifully done and incredibly emotional. To progress in the story you have to play little "games" which function kind of like if you found a "Baby's First Flash Game" book from about ten years ago. They're less fun and more of a hindrance to get through the game. Especially when you finish one and get a short, simple, one line of text picture that doesn't justify ten minutes of playing the mini-games. Also the photography mechanic, if it could even be called a mechanic, is simply the game telling you to point at something that is blatantly easy to find and then play one of the mini games. It's quite obvious from the mechanics of the UI that this was a mobile game first and foremost, which probably explains the simplicity of everything, but it's still a shame. Still, I recommend the game as long as you don't pay full price for it. I finished the whole thing in one three hour sitting and got it with a 33% off coupon. From the story alone, especially an emotional ending, I'd say I got my money's worth, but I wouldn't recommend it at all at \$12, especially when the mobile version is three times cheaper.. my god, this game is annoying. starting from the interface that you have to trudge through like a mire, and ending with the puzzles. i guess i can commend the devs on coming up with what looked like marginally original mechanics, but the puzzles themselves are extremely boring. most of them need very little strategy and are just about coming up with a sequence of actions that does the job (which inevitably gets frustrating at a certain point). just coming from the excellent "baba is you", i felt like that was a massive chore. even the stories are absolutely forgettable and bland. yes, they are all "dark", but only the first one has a semi-interesting twist in it. the rest are banal chichu00e9s about how things can go wrong. they even crammed some obligatory sjw into the last one, but as much as it usually annoys me, in this game it was the least of my worries.. What a unique game. It is rather short (took me right at 3 hours to complete), and is effectively a collection of mini games that get progressively harder as you get through each story. The game mechanics were pretty self-explanatory, and even the hardest
